

Weekend Challenge - Thinking Walk

Plan: Think about what you will need to take on your walk with you.

Discover: Are you exploring a new place, what types of plants live there, where are the plants growing, how many different plants live here?

Observe: Look closely at the plants, what is it like for a plant to live here?

Record: Use words or drawings in your doodle books to record some of the different plants. How are the plants different? What shape are they, how are the leaves different?

Collect: Take photos or collect a few appropriate things (with owner's permission where applicable) It might be an interesting leaf or twig that was on the ground or a photo of a really tall tree.

Have fun, I look forward to seeing what you discover on your walks.
