

Ducklings - Activity Ideas W/C 1st June 2020

Weaving

Resource any long fabrics and materials in the house and encourage your child to have a go at weaving. Model the language 'over', 'under' when your child is weaving and

allow them enough time to problem solve. Weaving is great for developing fine motor skills as well as mathematical thinking with creating patterns. You can also weave with natural resources from the garden.

Cloud Spotting

Encourage your child to lie on their back and close their eyes. Ask your child to open their eyes and look at the different clouds and their shapes. Ask them if they can see any special objects, animals or people from the clouds. Get them to take a picture of their chosen cloud. Once inside, look back at the photo of the cloud and scribe a story together about their special cloud.
