

Doves - Activity Ideas W/C 1st June 2020

WHITE ROSE MATHS

Click on Summer Term - Week 5 (w/c 18th May). Activities for this week are based on Superworm. Watch the video and click on the 'Get the Activity' tab.

There are many different activities for the week and the children do not need to have a go at them all.

Tin Can Ten Pin Bowling

Use recycled food tins and create a ten pin bowling game. Support your child to number each can and take turns to play. Your child can count how many tins they have knocked down and also see how many they have left. This is a fun game to help with addition and

subtraction. By also numbering the tins helps the child to recall their numeral recognition.
